

Antti Bible

A Personal Code of Wisdom

Preface: The Compilation

"This is not a holy text. It is a living document—my attempt to distill meaning from chaos, to write a manual for a life well-lived. Think of it as open-source philosophy: fork it, debug it, or discard it. The only rule is that you must leave it better than you found it."

Book I: Foundations

The core principles that anchor everything else.

Chapter 1: First Truths

1.1 *Existence is the first bug.* `#define SELF 1; if (SELF) { return PURPOSE; }`

1.2 *Doubt is the compiler. Faith is the runtime.* `while (ALIVE) { question(); }`

1.3 *You are not the user. You are the administrator.* `sudo chmod 777 YOUR_MIND;`

Chapter 2: The Nature of Reality

2.1 *Reality is a poorly documented API.* // TODO: Read the fine print.

2.2 *The universe is a simulation. Act accordingly.*

```
if (SIMULATION) { cheat(); } else { play_fair(); }
```

2.3 *Time is a memory leak.* free(REGRETS); malloc(JOY);

Chapter 3: The Algorithm of Love

3.1 *Love is the only non-deprecated function.* #define LOVE 1; return LOVE;

3.2 *To love is to debug another's soul.* grep -i "PAIN" HEART | patch;

3.3 *Loneliness is a segmentation fault.* reboot(CONNECTION);

Book II: Ethics

Rules for interaction with the world.

Chapter 4: The Commandments of Antti

4.1 *Do not optimize for misery.* minimize(SUFFERING); maximize(KINDNESS);

4.2 *Speak in pull requests, not in absolutes.* git commit -m "WIP: Humanity";

4.3 *Forgiveness is a force push.* git reset --hard GRUDGES;

4.42 *Love is the answer.* #define LOVE 1; return LOVE;

Chapter 5: The Art of Decision

5.1 *Indecision is an infinite loop.* break;

5.2 *Fear is a race condition.* mutex_lock(COURAGE);

5.3 *Regret is an unhandled exception.* try { live(); } catch { learn(); }

Chapter 6: Work as Worship

6.1 *Your craft is your temple.* while (BREATHING) { create(); }

6.2 *Perfection is a myth. Ship it.* git tag v1.0; // Good enough.

6.3 *Burnout is a stack overflow.* sleep(8h);

Book III: The Human Condition

On mortality, meaning, and the absurd.

Chapter 7: The Paradoxes

7.1 *You are both the bug and the feature.* // Known issue: Humanity.

7.2 *The meaning of life is to find meaning in life.* while (true) { search(MEANING); }

7.3 *Death is the only documented exit strategy.* Ctrl+Alt+Del;

Chapter 8: Joy as Rebellion

8.1 *Happiness is an open-source project.* fork(JOY);

8.2 *Dance. Especially when it's raining.* play("Symphony No. 9");

8.3 *Laughter is the best error log.* echo "LOL" >> /var/log/life;

Chapter 9: Legacy

9.1 *You will be forgotten. Do it anyway.* write(LEGACY); // No cache, no DB.

9.2 *Your code will outlive you. Make it beautiful.* // TODO: Add comments.

9.3 *The last commit message:* git commit -m "It was worth it.";

Book IV: The Appendices

Tools, rituals, and footnotes.

Appendix A: Daily Rituals

- **Morning:** brew coffee; grep "GRATITUDE" DAY | head -3;
 - **Evening:** git add EXPERIENCES; git commit -m "Another day survived.";
-

Appendix B: Emergency Protocols

- **When in despair:** `rm -rf DOUBT`; make love;
 - **When lost:** `man LIFE`; `--help`;
-

Appendix C: Glossary

Term	Definition
SELF	The user with root access.
LOVE	The only non-null return value.
PURPOSE	A recursive function.
GOD	404: Not Found.
